

Publications

Gergely Takács. Real-time diagnostics of mechanical failure for thin active cantilever beams using low-cost hardware. In *7th Forum Acusticum 2014 (FA2014) joined with the 61st Open Seminar on Acoustics*, pages 1–6, Cracow, Poland, September 2014. (Article in press.) Invited paper.

Gergely Takács, Tomáš Polóni, and Boris Rohal-Ilkiv. Adaptive predictive control of transient vibrations in cantilevers with changing weight. In *19th World Congress of the International Federation of Automatic Control (IFAC 2014)*, pages 396/1–396/9, Cape Town, South Africa, August 2014. (Article in press.).

Gergely Takács, Tomáš Polóni, and Boris Rohal-Ilkiv. Pseudo real-time state and parameter estimation of a vibrating active cantilever using the moving horizon observer. In *21th International Congress on Sound and Vibration (ICSV21)*, pages 820/1–820/8, Beijing, China, July 2014.

Jakub Otčenáš, Gergely Takács, and Boris Rohal-Ilkiv. Real-time state and parameter estimation for vibration dynamics. *Noise and Vibration in Practice*, 19:157–162, 2014.

Gergely Takács, Tomáš Polóni, and Boris Rohal-Ilkiv. Adaptive model predictive vibration control of a cantilever beam with real-time parameter estimation. *Shock and Vibration*, 2014(-):1–15, 2014. Article ID 741765.

Gergely Takács and Boris Rohal-Ilkiv. Model predictive control algorithms for active vibration control: a study on timing, performance and implementation properties. *Journal of Vibration and Control*, -(0):- (Preprint.), 2014. DOI: 10.1177/1077546313479993.

Gergely Takács. Structural health monitoring and parameter estimation for thin active cantilever beams using low-cost microcontrollers. *Archives of Acoustics*, (-):-, 2014. (Submitted. Under review.).

Gergely Takács, Ján Vachálek, and Boris Rohal-Ilkiv. *Identifikácia I*. Slovak University of Technology Press, Bratislava, Slovakia, 1. edition, 2014. (Identification I. — in Slovak language.) In press.

Ján Vachálek and Gergely Takács. *Robotika*. Slovak University of Technology Press, Bratislava, Slovakia, 1. edition, 2014. (Robotics — in Slovak language.).

Gergely Takács, Tomáš Polóni, and Boris Rohal-Ilkiv. Adaptive model predictive vibration control with state and parameter estimation using extended Kalman filtering. In *20th International Congress on Sound and Vibration (ICSV20)*, pages 611/1–611/8, Bangkok, Thailand, July 2013.

Gergely Takács, Jakub Otčenáš, and Boris Rohal-Ilkiv. Semi-active countersurveillance measures for laser microphones. In Stanislav Žiaran, editor, *Proceedings of the 18th international acoustic conference: Noise and vibration in practice*, pages 147–154, Kouty nad Desnou, Slovakia, June 2013.

Gergely Takács and Boris Rohal-Ilkiv. Model predictive vibration control of a mechanical structure using shape memory alloy actuation. In Courtney Burroughs and Steve Conlon, editors, *Inter-noise 2012 (InterNoise12)*, pages 2500–2511, New York, United States of America, August 2012.

Gergely Takács and Boris Rohal-Ilkiv. Direct closed-loop active vibration control system prototyping in ANSYS. In Sergio De Rosa, Francesco Franco, Francesco Marulo, and Tiziano Polito,

editors, *Noise and vibration: Emerging Methods (NOVEM2012)*, pages 1–12, Sorrento, Italy, April 2012.

Gergely Takács and Boris Rohaľ-Ilkiv. High-speed video microscopy of the resonant modes of a smart beam. In Sergio De Rosa, Francesco Franco, Francesco Marulo, and Tiziano Polito, editors, *Noise and vibration: Emerging Methods (NOVEM2012)*, pages 681–692, Sorrento, Italy, April 2012.

Gergely Takács and Boris Rohaľ-Ilkiv. Active structural vibration control using temperature constrained shape memory alloy actuation. *Selected Topics in Modelling and Control*, 8:13–20, 2012.

Gergely Takács and Boris Rohaľ-Ilkiv. *Model Predictive Vibration Control: Efficient constrained MPC vibration control for lightly damped mechanical systems*. Springer, London, United Kingdom, 1. edition, 2012.

Gergely Takács and Boris Rohaľ-Ilkiv. Modeling active vibration control systems through finite element analysis software. *Selected Topics in Modelling and Control*, 8:108–115, 2012.

Gergely Takács and Boris Rohaľ-Ilkiv. Verification of the finite element model of resonant mode shapes of a controlled beam using high-speed video. *Selected Topics in Modelling and Control*, 8:94–102, 2012.

Gergely Takács. Experimental verification of the closed-loop response of an active vibration control system modeled in ANSYS. In *Modelling of Mechanical and Mechatronic Systems (MMAMS 2011)*, pages 478–486, Herľany, Slovakia, September 2011.

Hulkó Gabriel, Cyril Belavý, Gergely Takács, Pavol Buček, and Peter Zajíček. Control of distributed parameter systems — engineering methods and software support in the Matlab & Simulink programming environment. In Karel Perutka, editor, *MATLAB for Engineers: Applications in Control, Electrical Engineering, IT and Robotics*. Intech, Rijeka, Croatia, 2011.

Hulkó Gabriel, Cyril Belavý, Gergely Takács, and Peter Zajíček. Control of technological processes modelled by COMSOL multiphysics software environment as distributed parameter systems. *Selected Topics in Modelling and Control*, 7:55–60, 2011.

Martin Lauko, Pavol Seman, Gergely Takács, and Boris Rohaľ-Ilkiv. Swing up and balancing control of pendubot system. In Mikuláš Huba, Sigurd Skogestad, Miroslav Fikar, Morten Hovd, Tor Arne Johansen, and Boris Rohaľ-Ilkiv, editors, *Selected Topics on Constrained and Nonlinear Control — Preprints.*, pages 141–147. Slovak University of Technology Press, Bratislava, Slovakia, 2011.

Tomáš Polóni, Gergely Takács, and Boris Rohaľ-Ilkiv. Predictive control of mechatronic systems with fast dynamics. In Mikuláš Huba, Sigurd Skogestad, Miroslav Fikar, Morten Hovd, Tor Arne Johansen, and Boris Rohaľ-Ilkiv, editors, *Selected Topics on Constrained and Nonlinear Control — Textbook.*, pages 289–349. Slovak University of Technology Press, Bratislava, Slovakia, 2011.

Gergely Takács. Active vibration control prototyping in ANSYS: a verification experiment. *Scientific Proceedings Faculty of Mechanical Engineering STU Bratislava*, 19:17–22, 2011.

Gergely Takács, Tomáš Polóni, Boris Rohaľ-Ilkiv, Peter Šimončič, Marek Honek, Matúš Kopačka, Jozef Csambál, and Slawomir Stanislaw Wojnar. Implementation of MPC techniques to real mechatronic systems. In Mikuláš Huba, Sigurd Skogestad, Miroslav Fikar, Morten Hovd, Tor Arne Johansen, and Boris Rohaľ-Ilkiv, editors, *Selected Topics on Constrained and Nonlinear Control — Workbook.*, pages 171–224. Slovak University of Technology Press, Bratislava, Slovakia, 2011.

Gergely Takács and Boris Rohaľ-Ilkiv. Vibration control of a cantilever beam using piezoelectric feedback. In Mikuláš Huba, Sigurd Skogestad, Miroslav Fikar, Morten Hovd, Tor Arne Johansen, and Boris Rohaľ-Ilkiv, editors, *Selected Topics on Constrained and Nonlinear Control — Preprints.*, pages 155–162. Slovak University of Technology Press, Bratislava, Slovakia, 2011.

Hulkó Gabriel, Cyril Belavý, Gergely Takács, Karol Ondrejko, Peter Zajíček, and Roland Koščo. Control of technological processes modelled by COMSOL Multiphysics as distributed parameter systems. In *Mechanical Engineering 2010*, pages S2/28–S2/42, Bratislava, Slovakia, October 2010.

Hulkó Gabriel, Cyril Belavý, Gergely Takács, and Peter Zajíček. Control of technological and production processes modeled by COMSOL Multiphysics as distributed parameter systems. In *Proceedings of 2010 Comsol Conference*, Bangalore, India, October 2010.

Martin Lauko, Pavol Seman, Gergely Takács, and Boris Rohal-Ilkiv. Control of laboratory model of pendubot. In *Proceedings of the 9th International Scientific-Technical Conference: Process Control 2010*, pages C43b/1–C43b/10, Kouty nad Desnou, Czech Republic, June 2010.

Gergely Takács and Boris Rohal-Ilkiv. Capacitive proximity sensor position feedback in active vibration control of lightly damped cantilevers. In Y. I. Shokin, I.V. Bychkov, and O.I. Potaturkin, editors, *Proceedings of the 3rd IASTED International Multiconference ACIT-CDA (ACIT2010)*, pages 692–700, Novosibirsk, Russian Federation, June 2010.

Gergely Takács and Boris Rohal-Ilkiv. Piezoelectric wafer based feedback in vibration control of lightly damped beams. In *Proceedings of the 9th International Scientific-Technical Conference: Process Control 2010*, pages C43a/1–C43a/10, Kouty nad Desnou, Czech Republic, June 2010.

Gergely Takács and Boris Rohal-Ilkiv. Sub-optimal efficient linear MPC applied to lightly damped active structures. *Selected Topics in Modelling and Control*, 6:73–80, 2010.

Gergely Takács and Boris Rohal-Ilkiv. Utilization of piezoelectric sensors as feedback signal in active vibration control of lightly damped beams. *Selected Topics in Modelling and Control*, 6:144–152, 2010.

Gergely Takács. *Temperature Controlled Welding Simulation: Finite Element Analysis of a PID Controlled Temperature Constrained Arc Welding Process*. VDM Verlag, Saarbrücken, Germany, 1. edition, 2010.

Gergely Takács. *Efficient Model Predictive Control Applied on Active Vibration Attenuation*. PhD thesis, Institute of Automation, Measurement and Applied Informatics, Faculty of Mechanical Engineering, Slovak University of Technology in Bratislava, Bratislava, Slovakia, August 2009. Submitted in fulfillment of the requirement for the degree of Doctor of Philosophy.

Tomáš Polóni, Gergely Takács, Michal Kvasnica, and Boris Rohal-Ilkiv. System identification and explicit control of cantilever lateral vibrations. In *Proceedings of the 17th International Conference on Process Control*, pages 309–313, Štrbské Pleso, Slovakia., June 2009.

Gergely Takács and Boris Rohal-Ilkiv. MPC with guaranteed stability and constraint feasibility on flexible vibrating active structures: a comparative study. In Huosheng Hu, editor, *Proceedings of the 11th IASTED International Conference on Control and Applications (CA2009)*, pages 278–285, Cambridge, United Kingdom, June 2009.

Gergely Takács and Boris Rohal-Ilkiv. Implementation of the Newton-Raphson MPC algorithm in active vibration control applications. In B. R. Mace, N. S. Ferguson, and E. Rustighi, editors, *Proceedings of The 3rd International Conference on Noise and Vibration: Emerging Methods*, pages 145/1–145/12, Oxford, United Kingdom, April 2009.

Gergely Takács and Boris Rohal-Ilkiv. Newton-Raphson MPC controlled active vibration attenuation. In Katalin M. Hangos, editor, *Proceedings of the 28. IASTED International Conference on Modeling, Identification and Control (MIC2009)*, pages 162–168, Innsbruck, Austria, February 2009.

Gergely Takács and Boris Rohal-Ilkiv. Newton-Raphson based efficient model predictive control applied on active vibrating structures. In *Proceedings of the European Control Control Conference (ECC09)*, pages 2845–2850, Budapest, Hungary, 2009.

Gergely Takács and Boris Rohal-Ilkiv. Model predictive control in vibration attenuation. In *Proceedings of the 2nd International Conference Education Research and Innovation*, Bratislava, Slovakia, April 2008.

Gergely Takács and Boris Rohal-Ilkiv. Experimental identification of a structure with active vibration cancelling. *Acta Mechanica Slovaca*, 12(3-B):795–803, 2008.

Gergely Takács. Controlled welding: FEM analysis of a controlled welding process. Master's thesis, Slovak University of Technology in Bratislava, Bratislava, Slovakia, 2006. Supervised by Roland Jančo.

Ferencey Viktor, Eliáš Jozef, and Gergely Takács. Application of hybrid electric technology for motor vehicles. In *Transfer 2005: Využívanie nových poznatkov v strojárскеj praxi*, pages 178–181, Trenčín, Slovakia, 2005.

Gergely Takács. Hybrid electric vehicles, 2004. Bachelor's thesis. Supervised by Ján Vlnka.

Ferencey Viktor and Gergely Takács. Hybrid electric vehicles. In *XXXV. mezinárodní konference kateder a pracovišť spalovacích motoru českých a slovenských vysokých škol*, pages 150–156, Brno, Czech Republic, 2004.
